hmakki387@gmail.com
Lebanon, Saida

Passionate Web Developer dedicated to creating dynamic and engaging websites. With a strong foundation in HTML, CSS, and JavaScript, I've leveraged my skills to contribute meaningfully to projects that inspire and educate. From an impactful internship at XpertBot to leading personal projects that help students explore web development, I am confident in my ability to craft effective solutions that leave a positive impact. You can explore a selection of my work at: https://hadi-makki.netlify.app/

SKILLS

- HTML
- CSS
- JavaScript
- ReactJs
- MySQL
- MongoDB
- Typescript
- expressJs
- nestJs

- Node.js
- TailwindCss
- jQuery
- Proficient in Laravel
- Experienced in MERN stack
- Redux
- Redux Toolkit

- problem-solving skills
- Creative thinking
- optimizing legacy code
- Meticulous Attention to Details
- building scalable microservices

EDUCATION

MIS, Lebanese University – Sidon, LB

EXPERIENCE

01/2023 – 09/2023 **Full-Stack Developer**, Digital Dojo AI – California, United States (remote)
- Designed and implemented RESTful APIs for efficient data access and manipulation.
- Increased API speed by 20% through code optimization and caching mechanisms
- Maintained and enhanced existing functionalities to ensure smooth operation.
- Collaborated with front-end developers to ensure seamless integration and user experience.
- Utilized NextJs, Tailwind CSS, and Redux in the development process.
- Contributed to the development of a user-friendly interface for internal tools,improving user effeciency by 15%.

01/2023 – 09/2023 **Intern**, XpertBot – Estonia (remote)
- gaining valuable hands-on experience in developing responsive and user-friendly websites using ReactJs and tailwindCss.
- Helped in providing bugs free interface for our users with a smooth and fast data delivering.
- Increased API throughput by 20%.
- Acquired practical knowledge in software development best practices, version control, and working in an agile team environment.
- Participated in code reviews, providing feedback and suggestions for improving code quality and readability.

10/2022 – present **Personal Projects**,
- Codestream:

An educational website dedicated to web development courses, serving as a launchpad for hundreds of aspiring developers. Through a curated curriculum, hands-on projects, and interactive exercises, WebStream equips students with the skills and knowledge to excel in the web development domain.
